

Project Design Phase

Problem – Solution Fit Template

Date	30 September 2026
Team ID	MKU201Team76ab4df35a238dc999eb5e6de
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

Purpose:

- ☐ Solve complex problems in a way that fits the state of your customers.
- ☐ Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- ☐ Sharpen your communication and marketing strategy with the right triggers and messaging.
- ☐ Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- ☐ **Understand the existing situation in order to improve it for your target group.**

Template:

Define CS, fit into CC	1. CUSTOMER SEGMENT(S) CS Who is your customer? - IT procurement team members and employees who request standard laptops - The Hardware team who receive and configure the laptops	6. CUSTOMER CONSTRAINTS CC What constraints prevent your customers from taking action? - Limited IT staff time for manual follow-up on each request - Must work within the existing ServiceNow Service Catalog - Requests need approval before fulfilment work starts	5. AVAILABLE SOLUTIONS AS Which solutions are available to the customers when they face the problem? - Procurement team creates and assigns the configuration task by hand, or follows up by email or in person - Pros: simple, needs no setup - Cons: slow, easy to overlook, adds manual effort	Explore AS, differentiate
	2. JOBS-TO-BE-DONE / PROBLEMS J&P Which jobs-to-be-done (or problems) do you address for your customers? - Order standard laptops and get them configured promptly - Make sure a configuration task is created and assigned to the Hardware team - Reduce manual intervention and errors in procurement	9. PROBLEM ROOT CAUSE RC What is the real reason that this problem exists? - The configuration step is not automated, so it can be overlooked or delayed - Nothing links an approved laptop request to a task for the Hardware team	7. BEHAVIOUR BE What does your customer do to address the problem and get the job done? - Places a laptop request through the Service Catalog and checks its status - Procurement team opens request records and raises tasks manually	
Identify strong TR & EM	3. TRIGGERS TR What triggers customers to act? - A new standard laptop is needed and the request is placed with Order Now - The laptop arrives and needs configuration	10. YOUR SOLUTION SL If you are working on an existing business, write down your current solution first. - A Flow Designer flow, "Standard Laptop Task", triggered from the Service Catalog - Its Create Catalog Task action is mapped to the Requested Item, with the short description "Laptop need to be Configured" - The task is assigned to the Hardware group automatically - The flow is attached to the Standard Laptop item through its Process Engine, so every order creates the task	8.1 ONLINE CH What kind of actions do customers take online? - Order the laptop from Service Catalog > Hardware - Check the Order Status and Request Number - Approvers approve in the Approvers section - Track Catalog Tasks on the Requested Item	Extract online & offline CH of BE
	4. EMOTIONS: BEFORE / AFTER EM How do customers feel when they face a problem or a job and afterwards? - Before: frustrated and unsure when the laptop will be ready - After: confident and satisfied, as the task is created automatically and the laptop is configured promptly		8.2 OFFLINE CH What kind of actions do customers take offline? - The laptop physically arrives and the Hardware team configures it - Informal follow-ups with the procurement or Hardware team
